

SUBtRaction With REGRouping

Ask yourself... How do I know when I need to regroup in a subtraction problem?

You need to regroup when there are more **ones** on the **bottom** in the **ones place**. Since there are not enough ones on top, you simply change the top number into a different group of tens and ones.

Example:

6 13 1. $73 = 70 + 3$ or $60 + 13$.

~~73~~

2. Draw it out.

3. Cross out the the number you are subtracting. (3 tens and 5 ones)

4. Count how many you have left. (3 tens and 8 ones)

$$\begin{array}{r} \cancel{73} \\ - 35 \\ \hline 38 \end{array}$$

SUBtRaction With REGRouping

You try it!

Remember to use your notes to help you.

$\begin{array}{r} 42 \\ - 17 \\ \hline \end{array}$	$\begin{array}{r} 81 \\ - 36 \\ \hline \end{array}$
$\begin{array}{r} 70 \\ - 15 \\ \hline \end{array}$	$\begin{array}{r} 67 \\ - 39 \\ \hline \end{array}$
$\begin{array}{r} 55 \\ - 18 \\ \hline \end{array}$	$\begin{array}{r} 90 \\ - 54 \\ \hline \end{array}$
